

LEYDEN
POWER
TRANSMISSION
COUPLINGS

**Engineered
for Excellence**

DESIGN FEATURES/BENEFITS

-  FRAS rated Flame-resistant, anti-static (British Coal Acceptance NO A2032) which enables couplings to be used in underground or hazardous areas.
-  Suitable for frequent stopping, braking or reversing applications.
-  Plain Bore resilient and rigid couplings – flanges manufactured from steel, as standard.
-  Dimensionally smaller than equivalent cast iron designs.
-  Specials such as shearpin, brakedisc/brakedrums spacer type, cardan shaft and various other designs available.
-  Full traceability and NDT available for high integrity applications.

Leyflex Resilient Couplings are Registered in compliance with Atex Directive 94/9/EC for equipment (or components intended for use on/in equipment) intended for use in potentially explosive atmospheres.

In addition to our commitment to quality, we offer a personal service together with very competitive delivery times.

QUALITY POLICY

The company's quality policy is:-

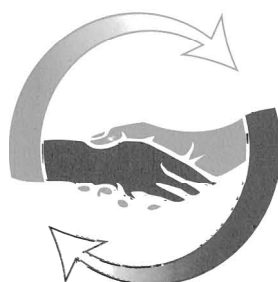

To ensure that its products and services have the appropriate level of specification and durability to fully meet their specified requirements and customer expectations, to be delivered on time and give maximum product value to the customer.

To pursue improvements in processing equipment, procedures and product so as to develop the service to cater for the changing demands of customer requirements.

To develop the philosophy that non-conformance to specification is unacceptable and that conformance is achieved by planned and controlled activities.

To conform to the requirements of BS/EN/ISO9001.

To place particular importance on the contribution that all employees make to quality and to work with them to provide the necessary information, training and support to enable them to achieve the required levels of competence.
